Company Profile:

Structural Engineering Associates (SEA), Kansas City’s oldest continually operating structural engineering firm is seeking a Restoration Design Engineer I/Project Manager I for our downtown Kansas City office. Founded in 1909, SEA has a long history in Kansas City, and our reputation for excellence has led to our involvement in some of the most notable restoration, repair, and historic preservation projects in the area.

Summary of Position:

As the structural Restoration Design Engineer I/Project Manager I you will serve as an integral part of the engineering design team. You will work on projects of varying sizes and types. Projects can include masonry façade repair, parking garage repair, corrosion mitigation in reinforced concrete structures, repair to structural steel framing, historic preservation, forensic analysis of existing structures, field investigations, above and below grade waterproofing, structural strengthening and other miscellaneous repairs of existing structures.

Duties and Responsibilities:

- Perform field investigations of existing structures, forensic analysis, preparation of repair and restoration reports, structural analysis of existing structures, preparation of structural repair construction documents and construction phase services
- Project management including coordination with in-house structural design engineers and other disciplines, client contact, and project financial performance
- Conduct client outreach and development of proposals
- Oversight and mentoring of less experienced engineers and drafts persons
- Perform duties within project timeline utilizing multiple codes
- Provide support to Structural Design Engineering staff
- Knowledge of structural framing systems, ability to understand load paths analyze existing conditions of structures and prepare drawings and specifications for repair projects
- Create and publish design standards, to drive efficiency and consistency in design
- Maintain project documentation, including calculations, project files, etc

Requirements:

- The successful candidate must have their PE license and ability to obtain licenses in other states as required
- Candidate must have a minimum of eight years’ experience performing condition assessments and repair of existing structures
- Previous project management experience and client contact a plus
- Individual must be self-motivated, able to work independently, possess the ability to perform field investigations, work on multiple projects at the same time and communicate effectively with clients
- Sincere commitment to work collaboratively with all constituent groups, including staff, clients, vendors,

and contractors

- Travel as required by project assignments (limited travel with overnight stays)

Compensation Plan:

SEA offers an attractive compensation package that includes health insurance, vision insurance, life insurance, and long-term disability, a 401k and profit-sharing plan, as well as bonus and incentive programs.

Structural Engineering Associates is an equal opportunity employer. All applicants will be considered for employment without attention to race, color, religion, age, sex, sexual orientation, gender identity, national origin, Veteran, or disability status.
